

# TURN DELAYS IN IDMP/SPOR REQUIREMENTS INTO OPPORTUNITIES

Adjust your IDMP approach to gather additional cross functional benefits

*"CAMELOT recognizes IDMP as an organizational challenge. We help our clients to tackle the change management and governance aspects of IDMP."  
"IDMP is the right momentum to improve your product master data and integrate the regulatory requirements into a wider master data strategy."*

CAMELOT Management Consultants

# SAVE YOUR IDMP INITIATIVE

There is a good chance that delays in finalization of IDMP/SPOR requirements are in focus of your management team and pose a risk to your IDMP initiative, budgeting, and resourcing. Potentially your initiative, or parts of it, will be set on hold, team members may be reallocated to other projects or leave the organization because of the continuous postponements and uncertainties around IDMP. You are at risk losing the knowledge and achievements that were created in the last years. As dissatisfying as this situation is, it also provides a great opportunity to address underlying challenges, which surfaced with IDMP.

IDMP is more than just a challenge for the regulatory department it is a challenge for all functional units maintaining and using product data. This is a chance to conflate data management processes and governance and to create new benefits. By assessing data management processes, governance, standards and on-going initiatives CAMELOT can help you defining a vision that combines IDMP requirements and opportunities in MDM. The result is a Win-Win situation for your company. Product Master Data are addressed cross-functional and funding and resourcing is supported by a wider range of benefits and sponsors. Our IDMP assessment helps you to discover underlying MDM challenges holistically:

IDMP Assessment	
<b>I. Opportunity &amp; Dependency Review</b>	<ul style="list-style-type: none"><li>▶ Review current MDM strategy, roadmap and initiatives to identify opportunities</li><li>▶ Check if industry best practices and CAMELOT experiences can be combined with IDMP objectives to realize additional benefits</li></ul>

<b>III. Business Case</b>	<ul style="list-style-type: none"><li>▶ Create business case for different realization options; IDMP and opportunities</li><li>▶ Sponsorship coaching</li></ul>

## Challenges of IDMP

**IDMP is as much about organizational challenges as it is about IT and data**

### Technology/data

- Data distributed across different systems/data silos
- Unstructured data in documents
- Missing data/lack of data quality
- External reference standards and new vocabulary
- Life cycle management for product data need to be reworked

### Organization

- Responsibilities to be defined to maintain data in the long run after initial deadlines
- Data spread across your organization and thus a wide range of different departments involved
- Data sources inside and outside your organization
- Data governance required

## Opportunities from EIM Perspective

**Opportunities in Master Data Management, Data Governance, and Product Design can save your IDMP initiative**

- Data governance improves data quality and process efficiency
- New and improved cross-functional and cross-systems maintenance processes reduce lead-times and increase process efficiency
- Data inheritance reduces maintenance efforts significantly and improves data quality
- Data harmonization and elimination of duplicates improves data quality and reporting
- Simplification of system landscape reduces IT costs and increases process efficiency
- Product lifecycle management improves data quality, process efficiency and lead-time, and improves reporting

**IDMP provides a great opportunity for on-going or new EIM activities**

*“The underlying challenge of IDMP is fundamentally a master data challenge”*

*“The 5 new ISO IDMP standards are all about master data”*

European Medicines Agency (EMA)

## How CAMELOT can help you

**Bridge the gap between the involved stakeholders**  
Create awareness and alignment with all involved stakeholders (e.g. R&D, RA, manufacturing, SCM) and help to define a common language.

**Build the organization for data gathering**  
Define the right structures for IDMP: As a program to meet the defined deadlines but also for the long run (roles and responsibilities for data gathering/maintenance).

**Define the right governance level**  
Define the right governance structures and levels for the different kind of data and ensure the alignment with master data governance.

**Change management**  
Identify change impact on the organization, ensure business engagement and readiness for the change associated with IDMP.

*“When defining the IDMP strategy, CAMELOT strongly recommends to align the IDMP program with ongoing MDM initiatives or to leverage learnings from past MDM projects.”*

Marc Hoffmann · Head of Enterprise Information Management, North America · CAMELOT Management Consultants Inc.
